PROFESSIONAL SUMMARY

Aerospace Engineering student at UT Arlington. Hands-on experience designing, building, and testing mechanical systems through self-directed projects and a NASA mission design program. Seeking an engineering internship where I can contribute and keep learning.

EDUCATION

University of Texas at Arlington 2025 ~ **2028**
B.S. Aerospace Engineering | GPA: 3.92

Chennault Aviation Academy 2024 – 2025
Private Pilot Certificate | Single Engine Land (ASEL)

Sam Houston State University 2021 – 2023
Computer Science | GPA: 3.74

EXPERIENCE

Mechanical Engineer – NASA L'SPACE Mission Concept Academy **Remote | Sep 2026 - Present**

- Selected for a competitive 15-week NASA-funded program developing a preliminary mission concept following the NASA mission life cycle through the formulation phase.
- Developing skills in interdisciplinary teamwork, technical problem solving, cross-discipline communication, trade studies, and deriving requirements within a structured engineering environment.

Member – AeroMavs Rocketry Team, UT Arlington **Arlington, TX | August 2026 – Present**

- Designing and building a high-power rocket for NAR Level 1 certification, using Open Rocket for stability and flight simulation and SolidWorks for component modeling.

Peer-Led Team Learning Leader – UT Arlington **Arlington, TX | Aug 2026 - Present**

- Facilitate weekly problem-solving sessions for undergraduate Physics 1 students, guiding groups through collaborative work on mechanics, energy, and rotational motion.
- Collaborate weekly with faculty to develop lesson plans and align session content with course objectives.

Lumber Associate – The Home Depot **Dallas, TX | Jun 2025 – Aug 2026**

PROJECTS

Engineering Design Final Project **SolidWorks | Microcontrollers | 3D Printing | Office Suite**

- Designed and 3D printed a fully automated Arduino-controlled mechanism in a team of 4, successfully delivering all three ping pong balls into a target cup from 6 feet away in well under the 30-second limit and earning full extra credit.
- Integrated DC motors, drive wheels, and buck converters into a self-contained battery-powered system, implementing power regulation and motor control through custom firmware.
- Produced full design documentation including GD&T drawings, a bill of materials, and thermal simulation analysis in SolidWorks.

Motor Thrust Stand **Microcontrollers | C/C++ | MATLAB | SolidWorks**

- Designed and fabricated a motor thrust stand using a 10 kg load cell, HX711 amplifier, and NUCLEO-F446RE, logging real-time force and current data via MATLAB.
- Applied the stand to characterize motor and propeller performance for drone diagnostics and performance validation.

Beam Solver **MATLAB | Engineering Statics**

- Developed a MATLAB solver for statically determinate pin-roller beams, computing support reactions via matrix equilibrium equations and generating shear force and bending moment diagrams.

AWARDS & HONORS

- **Dean's List**, University of Texas at Arlington -- **2026**
- **Dean's List**, Sam Houston State University -- **Fall 2021, Spring 2022, Fall 2022**
- **President's List**, Sam Houston State University -- **Fall 2021, Spring 2022**

SKILLS

Engineering Competencies: Data Acquisition, Technical Documentation, Microsoft Office Suite
CAD & Analysis: SolidWorks, SolidWorks Simulation, GD&T, OpenRocket
Programming: MATLAB, C/C++, Git/Version Control
Fabrication & Hardware: 3D Printing, Soldering, Electronics Troubleshooting, Microcontrollers
